

How to Use COAT DEFENSE®

daily PREVENTATIVE POWDER

- Shake or pour powder directly onto desired area, massaging it with fingertips in a circular motion down to the skin.
- In hard to reach areas, such as legs or underbelly, pour powder into palm of hand and place directly onto desired area, massaging onto coat and down to skin.
- Allow Powder to sit on skin and work it's magic.
- After Powder has had time to work, either under a saddle pad during a ride, or for a few minutes on fungal growth, use a curry or brush to remove grime or scabs. You can leave excess Powder on to help keep the coat clean, relieve symptoms, or prevent bacterial/fungal build-up.
- Reapply as needed.
